MEMORANDUM FOR: Assistant Director Science and Technology
National Security Agency

SUBJECT : Assistance with the ABM Study.

1. As you know, we have reached the point with the ABM Study where we have most of the necessary inputs and a methodology which is developed almost in full. There are, however, still unresolved problems and an appreciable amount of data resolution to be accomplished.

2. The pressures for completion of the Study are such that I find it necessary to ask for assistance. I believe that someone from your Agency who has some familiarity with operations analysis and the collection systems of concern could, in two to three weeks of full-time effort, make a substantial contribution to the more rapid completion of the Study.

3. I am making a similar request of other participants.

25X1A

Chairman
ABM Study
